Abstract

The contemporary era has witnessed prodigious makeshift in the field of medical sciences, especially in therapeutic field. Many pharmaceutical organizations have established Research & Development wings (R&D) with particular emphasis in launching new drugs to overcome the side effects of their previous parent/original congeners. This purposeful endeavor generated them expedient results. Albeit to these efforts, few unusual adverse drug reactions (ADRs) in sparse have been reported elsewhere.

Key words: therapeutics, pharmaceutical, R&D, side effects and ADR
