### ABSTRACT:

Pain is a defense reaction caused due to any kind of external or internal injury or tissue damage.

It is very unpleasant feeling that causes discomfort and can be a defense mechanism as well.

There are many kinds of pain that stays for only a short period of time i.e. Acute pain and pain that remains for a longer period of time i.e. Chronic pain. There is pain that arises due to activation of nociceptor receptors that are present in skin, joints, muscles, viscera and many internal organs, that type of pain is known as nociceptive pain.

There are many Drugs used to treat different types of pain such as NSAID's, Analgesics and many more, but contains systemic side effects and also causes Adverse Drug Reactions which are fatal and can affect the lifestyle of human beings, to reduce the side effects, many different approaches are followed to reduce or remove the ill effect of such drugs.

Traditionally herbal drugs are used in place of synthetic once to reduce or remove the Adverse reactions and lesser the side effects. This review consists the list of medicinal plants, part of the plant, and extract used in the treatment of pain.

**Keywords: NSAID's, Adverse drug reaction, Herbal plants, pain, Nociception, Analgesic**
