### Abstract

Antibiotic Induced Diarrhoea is defined as the passage of three or more loose or liquid stool per day after taking an Antibiotic for another In- fection. Clinically, diarrhea can be classified into many ways, i.e. based on the time course (acute vs. persistent vs. chronic), volume (large vs. small) , pathophysiology (secretory vs. osmotic vs. inflammatory vs. functional) , epidemiology (community-acquired vs. hospital-acquired vs. traveler'sdiarrhea) or stool characteristics (watery vs. fatty vs. inflammatory) . The present Review article focus different aspects of Diarrhoea which originate due to administration of a particular group of Antibiotic . The article also highlight latest treatment approach.

**Keyword :** Antibiotic,Purgative, Malabsorption, Autoimmune,Rotavirus
