Abstract

The recent practice of characterization and control of impurities in pharmaceuticals substances and products are investigated with prominence on issues specific to the active pharmaceutical ingredient and pharmaceutical productions. The control of impurities in the pharmaceutical industry is an important task to the developer. The International Conference on Harmonization (ICH) has formulated a workable guideline regarding the control of impurities in pharmaceutical drug substance as well as productions. In this investigation article, impurities, its types and origin of impurities have been discussed briefly.

Keywords: Impurities, ICH, pharmaceutical substance, pharmaceutical products
